

I am a Registered Nurse (Specialty in Geriatrics and Mental Health) with a Real Estate License. From 2013-2019, I owned and operated a Homes for Special Care (HSC) where I was part of the first pilot rollout of the Community Homes for Opportunities (CHO) by the Ministry of Health and Long-Term Care (MCHLTC) to the Canadian Mental Health Association (CMHA).

In 2006 – 2010, I worked in the Long-Term Care Homes Sector in various positions including Director of Nursing, Administrator, Director of Operations to Quality, Compliance and Performance Improvement.

In 2012, I decided to focus on the real estate aspect of the business. This led to purchasing, working with contractors, permits and building codes, municipal negotiations, compliance with fire safety, public health, and the Retirement Homes Regulatory Authority to license, marketing, and bring back homes that offered services to seniors in various communities where previous homes had closed and/or a need existed.

Over the years, I have been fortunate to work with many of you. You are gifted and special caring individuals that operate the homes that provide services to people who experience homelessness, mental health, addictions, and various disabilities.

When the time comes or if you are thinking to sell your business and real estate, please take a moment to call me, as I have over a decade of hands-on experience and truly understand the right person it may take to operate the home. I will take care of all your needs and make the process as seamless as possible while respecting the confidentiality of the business, residents, employees, financials and surrounding community.

It will be impossible to replace you, but I will make every effort to find a buyer who will be dedicated to providing a caring approach to the residents and continue to build the business.

When you need someone with experience, put your trust in me and I guarantee you will not be disappointed.

“Think Real Estate, Think Rahim”

Top 10 things to do when selling or buying a home.
